

Dear Parents and Patients,

One of the most consistent concerns I hear from my patients and their parents pertains to missing school for orthodontic visits. As you know, we can only accommodate a small number of our patients during after-school hours. In order to serve you better we are setting up a satellite clinic at or near your school. We are able to do this because of our new OrthoBus (BracesBus). This is a mobile orthodontic clinic that has four chairs, complete sterilization capacity, and the ability to accommodate almost all of the orthodontic appointments for our patients. We will be visiting schools every six weeks to accommodate regular return appointments. The only visits that need to be scheduled at our main office are appointments with x-rays- the start, the finish, and usually one appointment during treatment.

The mobile orthodontic clinic is an extra service we are offering for our patients at no additional charge. However, it is not required. Our regular office days will remain the same and we will see patients with the mobile orthodontic clinic on Thursdays. If you would like to have your child seen on the OrthoBus (BracesBus), we ask that you complete the enclosed permission slip. Many school locations are currently available, but some are not. We will continue to add new locations. If your child's school is not currently available, we will let you know when it becomes available. As always, please call our office with questions or email me at greg@gregolsenortho.com.

I am very excited to be able to provide this service. I always strive to provide the very best orthodontic treatment and the very best service for my patients and their families. This is our latest effort to do more for all of you who mean so much to us.

Sincerely,

Gregory D. Olsen, DDS, MSD
